EDUCATION

Bachelor of Engineering
University Of Mumbai

08/2019 - 06/2023

Courses
- Computer Engineering

SKILLS

React Js | Node Js | Sql | JavaScript | Express

Redux | GraphQL | Html | Css | MongoDb

Git | Web3 | Solidity | Blockchain | Python

React-native | UI/UX

WORK EXPERIENCE

Full Stack Developer
Refr

07/2023 - 10/2023   *Remote*

Achievements/Tasks
- Built interactive, responsive pixel-perfect UIs for a complete mobile app from scratch.
- Developed a social recommendation app that lets users earn credits that can be used as cash in the app.
- Developed a vendor-side web app for businesses listed in the social recommendation app.

Full stack Developer Intern
Brained

04/2021 - 10/2021   *Remote*

Achievements/Tasks
- Successfully developed robust Restful API services utilizing NodeJS while working with both MongoDB and SQL databases
- I demonstrated proficiency in using **Git** for version control to efficiently manage project timelines
- Collaborated with a cross-functional team to bind APIs with the frontend utilising **ReactJS** and **Redux**
- Additionally, I effectively communicated with clients through attending calls and translating business requirements into innovative technology solutions

Web Devleopment Intern
The Sparks Foundation

11/2022 - 12/2022   *Remote*

Achievements/Tasks
- Involved utilizing MongoDB, **Express**, React, and **Node.js** to create a dynamic application that seamlessly integrated frontend and backend functionality.
- I successfully implemented **RESTful APIs** to enable smooth communication between the frontend and backend, allowing for fast and efficient data retrieval and storage.
- I utilized Git for version control to maintain the project's codebase .

PERSONAL PROJECTS

AutoBackend (12/2021 - 06 / 2023) ⧉
- Technologies Used:- JavaScript, NodeJs, MySql, ReactJs, Redux.
- AutoBackend is a powerful tool that **generates high-quality, deployable code** with database scripts automatically.
- This tool is user-friendly and provides an intuitive interface that is as simple to use as popular API testing tools such as Postman.
- AutoBackend efficiently **configures the entire database**, streamlining the development process and minimizing the need for manual database configuration.

Vangaurd Vogue (02/2023 - 06 / 2023)
- Technologies Used:- JavaScript, NodeJs, MySql, ReactJs, Redux, **Figma** ,TailwindCSS,
- Vangaurd Vogue is an ecommerce store for trendy anime apparels.
- Collaborated with the client to understand their branding and design preferences, and implemented a custom design that reflected their unique style and vision.

Invoice Management System (03/2022 - 03/2022)
- Technologies Used :- **Solidity**, ReactJs, NodeJs, **Web3Js**, Ethereum, BlockChain.
- An dapp to create and manage invoices .
